

2010 OUTCOMES Drug Formulary and Pharmacy Benefit Guidelines

The **MedBen Outcomes Preferred Drug List** defines the copayment tier status of “preferred” medicines most commonly prescribed for members. It may not include all drugs covered by your prescription drug benefit and “Non-Preferred” or Tier 3 medicines **do not** appear. For benefit coverage or restrictions please check your benefit plan document(s). This listing is revised from time to time as new drugs and new prescribing information becomes available.

It is recommended that you have this list of medications available when you are with your physician and a prescription drug is going to be part of the treatment for a clinical condition.

Key to Notations:

PA: Prior authorization to ensure clinical appropriateness of this or previous therapy with other similar medications may be needed before claims for one of these medications will be accepted.

ST: A step therapy protocol may apply to this medication. Claims for this medication may be covered based on the enrollee's previous medication history. If prior medication history does not meet clinical guidelines, authorization may be required prior to acceptance of claims.

QL: Quantity limitations (maximum number of tablets/capsules, etc. per month or year) may be applied to this medication.

PREFERRED DRUGS – ALPHABETIC ORDER

A	
Tier 2	ABILIFY
Tier 1	ABREVA (OTC)
